A8OK RULES

for GREENCUBE (IO-117) Satellite Users

If we have an internet connection, we engage the UHM protocol.
Please call us once and verify the signal we received before attempting to make another call.
You do not need to send RR73 if you received our RR73 (you are automatically in the log).
Do not call if QSO was made previously (check CLUBLOG daily update).
We will try to be efficient with MULTI-CALLS.

We highly recommend studying this www page :
https://moonbounce.dk/hamradio/greencube-terminal-program.html

for RS-44 Satellite Users

We don't need your locator, name etc.
Just CALLSIGN + RST.

Check our https://www.facebook.com/groups/1472348776313779 and https://twitter.com/Ludek_OK2ZC and https://hams.at/
where we will be sharing when we will be QRV.

Keep in mind that this is primarily an HF expedition. SAT traffic will be mainly during daylight hours with respect to mosquitoes 😊

Setup will be:
IC-9700, Alaskan Arrow Antenna 10el+4el, Tripod Manfrotto BeFree, PstRotator OZ9AAR terminal, Soundmodem UZ7HO, Look4Sat for Android, Log4OM

Good hunting de Ludek OK2ZC from CDXP team
